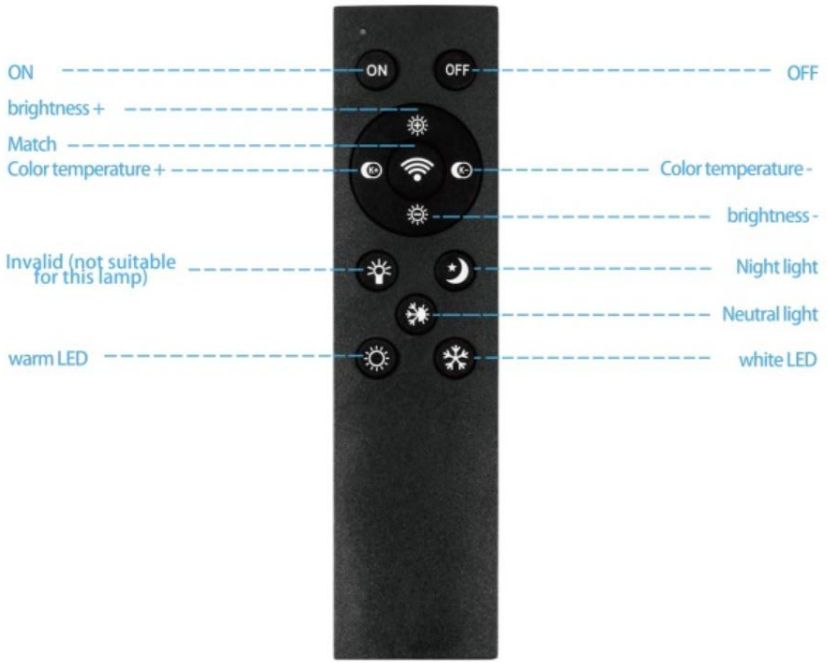
Regulator



How do you connect the remote control to the lamp?

(Only the dimmable lamp contains the remote control.)

Connection:

1. First turn on the lamp using the switch on the wall and at the same time press button on the remote control.

2. The lamp will blink rapidly, which means the connection is successful.

Hints:

1.The remote control can control multiple lamps, the connection method is the same.

2.Memory function: The lamp can save the setting.

Note: Please keep the mode when you switch on for at least 10 seconds, then the lamp can save the mode next time
